SUMMARY

Operations-focused SOC Analyst with 4+ years of experience supporting enterprise Windows environments, identity management, endpoint operations, and infrastructure troubleshooting. Hands-on experience in SIEM monitoring, log analysis, alert triage, and incident investigation using Splunk, Wazuh, ELK, and Windows event telemetry within operational and lab-based SOC environments.

EXPERIENCE

IT Operations & Technical Support Specialist | The waterway Developments | Cairo | May 2025 - Present

- Provided Tier 1/2 enterprise support for 200+ users, resolving endpoint, access, connectivity, and system-related incidents through ticketing systems (Zoho ticketing operations).
- Monitored and analyzed Windows and Linux logs using monitoring tools to support incident escalation, system visibility, and troubleshooting activities.
- Supported endpoint remediation and policy enforcement following security alerts and suspicious activity initial investigation.
- Managed Active Directory provisioning, RBAC permissions, and access control processes for employee on-boarding and off-boarding.
- Provisioned and hardened employee workstations using organizational security and access control standards.
- Collaborated with infrastructure teams to investigate and resolve network, authentication, and service availability issues.

IT Help Desk | Misr Elhegaz Group | Cairo | September 2024 - April 2025

- Performed daily server and network monitoring activities to maintain operational availability and infrastructure stability.
- Delivered enterprise user support for 120+ employees, resolving endpoint, operating system, and connectivity-related incidents.
- Deployed and configured Windows-based workstations, including OS installation, user provisioning, and operational setup.
- Managed employee off-boarding procedures, including secure data backup and endpoint sanitization processes.
- Maintained IT asset inventory records for endpoint devices and operational equipment tracking.
- Created troubleshooting documentation and internal support procedures to improve incident resolution efficiency.

IT Help Desk Specialist | House Of Consultancy Group | Cairo | August 2023 - August 2024

- Provided end-user support across Windows and macOS environments, resolving application, endpoint, and operating system issues.
- Performed hardware and software upgrade activities to maintain operational continuity and endpoint stability.
- Managed user access permissions and account administration processes aligned with organizational access control policies.
- Supported domain hosting, DNS management, and email administration through cPanel-based environments.
- Assisted with backup and system restoration operations to reduce downtime and support business continuity.
- Delivered technical guidance and user training on internal systems, applications, and operational workflows.

IT Help Desk & Technical Support Operator | Educational Platform | Cairo | July 2019 - November 2021

- Diagnosed and resolved operating system, hardware, and network connectivity issues within live production environments.
- Configured and supported LAN/WAN connectivity, coordinating with ISPs to troubleshoot network-related service disruptions.
- Performed system maintenance and operational troubleshooting activities to support service stability and minimize downtime.

Junior IT Technician | Self Employed | Cairo | July 2018 - June 2019

- Installed and maintained CCTV systems, basic IT hardware, and IP-based devices in on-site environments.
 - Performed troubleshooting and maintenance for network connectivity and hardware-related operational issues.
-

PROJECTS

Windows Detection & Monitoring Lab

- Built a Windows security monitoring lab using Wazuh, Sysmon, Splunk, and Atomic Red Team.
 - Generated Windows authentication, PowerShell, and endpoint telemetry using Atomic Red Team to validate alerting and investigation workflows.
 - Analyzed Windows event telemetry and created alerting rules for suspicious authentication and PowerShell activity.
 - Performed endpoint investigation and incident documentation within a controlled SOC-style environment.
-

SKILLS

Security Operations:

- Splunk, Wazuh, ELK, Sysmon, Wireshark, Zeek, Snort, MITRE ATT&CK

Infrastructure & Networking:

- Windows Server, VMware, TCP/IP, DNS, DHCP, VLANs, VPN

Systems & Identity:

- Active Directory, Group Policy, RBAC, User Provisioning, Access Control

Operational:

- Incident Documentation, Troubleshooting, Root Cause Analysis, Cross-team Coordination

Professional Capabilities:

- Incident Documentation - Root Cause Analysis - Cross-team Coordination - Troubleshooting - Operational Support - Attention to Detail - teamwork - analytical thinking - communication - problem solving
-

TECHNICAL TRAINING

Networking Fundamentals (CCNA-Level)

- TCP/IP, DNS, DHCP, VLANs, Routing, NAT

Windows Server & Active Directory (MCSA-Level)

- Active Directory, Group Policy, DNS, DHCP, VMware

Azure Fundamentals (AZ-900)

- Azure Services, Virtual Networks, NSGs, Cloud Fundamentals

SOC Analyst Training | CyberGuardX Academy | In Progress

- Performed SIEM monitoring, alert triage, and incident investigation using Splunk, Wazuh, and ELK.
 - Conducted Windows/Linux log analysis and network traffic investigation using Sysmon, Wireshark, Zeek, and Snort.
 - Applied MITRE ATT&CK techniques during simulated detection and incident response workflows.
-

EDUCATION

Bachelor of Management Information Systems (MIS) | Al-Alson High Institute of Computer | Cairo | 2021 | Very good

- **Graduation Project:** Designed and developed a responsive front-end web application using **HTML, CSS, and JavaScript**
-
